

Overview for Fish/Trout Contract (8415-05)

Prior to utilizing a contract, the user should read the contract in it's entirety.

DESCRIPTION

► This contract for the Fish & Boat Commission has just one awarded supplier, Tellico Enterprises, Inc. (SAP# 4600005227). The Fish & Boat Commission purchase approximately 100,000 trout per year, which are stocked in various Commonwealth lakes & streams in quantities and at times specified by the agency.

CONTRACT INFO

Contract Number & Title	8415-05 - Fish/Trout Contract
Number of Suppliers	1 - see description at left for name and SAP contract #
Validity Period	Valid from November 1, 2003 through February 28, 2009
DGS Point of Contact	Karen Gera, Commodity Specialist
Contact Phone #	(717) 346-3847
Email	kgera@state.pa.us

PRICING HIGHLIGHTS

► See contract for pricing.

PROCESS TO PURCHASE

► PA Fish & Boat Commission typically makes one large order annually by issuing an SAP purchase order.

SPECIAL CONTRACT TERMS AND CONDITIONS

CONTRACT SCOPE/OVERVIEW: This Contract No. 4600005227 (identified here and in the other documents as the "Contract") will cover the requirements of the Fish & Boat Commission Commonwealth agencies for Fish (Rainbow Trout).

ORDER OF PRECEDENCE: These Special Contract Terms and Conditions supplement the Standard Contract Terms and Conditions For Statewide Contracts for Supplies. To the extent that these Special Contract Terms and Conditions conflict with the Standard Contract Terms and Conditions For Statewide Contracts for Supplies, these Special Contract Terms and Conditions shall prevail.

TERM OF CONTRACT: The Contract shall commence on the Effective Date the contract is approved and expire on February 28, 2009.

OPTION TO EXTEND: The Department of General Services reserves the right, upon notice to the Contractor, to extend the Contract or any part of the Contract for up to three (3) months upon the same terms and conditions. This will be utilized to prevent a lapse in Contract coverage and only for the time necessary, up to three (3) months, to enter into a new contract.

OPTION FOR SEPARATE COMPETITIVE BIDDING PROCEDURE: The Department of General Services reserves the right to purchase supplies covered under this Contract through a separate competitive bidding procedure, whenever the department deems it to be in the best interest of the Commonwealth. The right will generally be exercised only when a specific need for a large quantity of the supply exists or the price offered is significantly lower than the Contract price.

INSURANCE - Contractor shall purchase and maintain at its expense the following types of insurance, issued by companies acceptable to the Department and authorized to conduct such business under the laws of the Commonwealth of Pennsylvania.

- a. Worker's Compensation Insurance for all of the Contractor's employees and those of any subcontractor, engaged in work at the site of the project in accordance with the Worker's Compensation Act of 1915 and any supplements or amendments thereof.
- b. Public liability and property damage insurance to protect the Commonwealth, the Contractor, and any and all subcontractors from claims for damages for personal injury (including bodily injury), sickness or disease, accidental death and damage to property, including loss of use resulting from any property damage, which may arise from operations under this contract whether such operation be by the Contractor, by any subcontractor or by anyone directly or indirectly employed by either. The limits of such insurance shall be in an amount not less than \$500,000 each person and \$2,000,000 each occurrence, personal injury and property damage combined. Such policies shall be occurrence rather than claims-made policies and shall name the Commonwealth of Pennsylvania as an additional insured. The insurance shall not contain any endorsements or any other form designed to limit and restrict any action by the Commonwealth, as an additional insured, against the insurance coverage in regard to the work performed for the Commonwealth.

Prior to commencement of work under this contract, the Contractor shall provide the Department with current certificates of insurance. These certificates shall contain a provision that coverages afforded under the policies will not be cancelled or changed until at least thirty (30) days' written notice has been given to the Department.

- c. Comprehensive Automobile Liability Insurance to protect the Commonwealth and the Contractor from claims for damages for personal injury (including bodily injury or death) and

damage to property, including loss of use resulting from any property damage, which may arise from the use of Contractor owned or leased vehicles in the performance of this contract whether such operation be by the Contractor, by any subcontractor, or by anyone directly or indirectly employed by either. The limits of such insurance shall be in an amount not less than \$500,000 each person and \$2,000,000 dollars each occurrence, personal injury and property damage combined. Such policies shall be occurrence rather than claims-made policies and shall name the Commonwealth of Pennsylvania as an additional insured.

TERM AND PRICE:

The Contractor will enter into a five (5) year contract with the Commonwealth, beginning on the date the contract is approved and ending February 28, 2009. The contract is a fixed price contract. The price for the first full year of the contract (March, 2004 to end of February 2005) is the bid price. Every year thereafter, the Bureau of Purchases will adjust the contract price in accordance with changes to the average Consumer Price Index. (As used in this clause, the term Consumer Price Index refers to the Consumer Price Index for all Urban Consumers (U.S. All Items) established by U.S. Department of Labor, Bureau of Labor Statistics.) Therefore, during the term of this contract, the Commonwealth shall adjust prices based upon the (not seasonally adjusted) Consumer Price Index Series ID: CUUR0000SA0. The unadjusted January 2003 is the base. At the beginning of March, the Bureau of Purchases will calculate the adjustment to the contract price.

To calculate the adjustment, divide the current Consumer Price Index by the January 2003 base to arrive at a multiplier. A multiplier of 1+ will result in an increase in prices; a multiplier of less than 1 will result in a decrease in prices. In the event of no change in the CPI, or the change in the unit price does not exceed 5% no change in price shall occur.

TROUT SIZE AND QUALITY SPECIFICATIONS:

1. Size as referred on the attached spreadsheet is:
 - a. Regular size rainbow trout at least 9" in total length and weigh a minimum of 44 lbs/100 fish
 - b. Premium size rainbow trout at least 11" in total length and weigh a minimum of 60 lbs/100 fish.
 - c. Trophy size rainbow trout at least 18" in total length and weigh a minimum of 2 lbs per fish
2. Diseases
 - a. All trout purchased by the PFBC will show no clinical signs of disease.
 - b. Each contract year, no later than one month prior to the first stocking, the Contractor will provide a current annual disease inspection report for those fish destined for PFBC procurement. The PFBC will accept disease inspection reports from the PA Dept. of Agriculture or other accredited fish pathology laboratory. For fish that originated in and remained in facilities within the Great Lakes Basin and/or the Commonwealth of Pennsylvania, the annual disease inspection report must indicate that the following pathogens (diseases) were not detected: *Yersinia ruckerii* (enteric redmouth disease), VHSv (viral hemorrhagic septicemia), and IHNV (infectious hematopoietic necrosis). For fish that did not originate and remain in facilities within the Great Lakes Basin and/or the Commonwealth of Pennsylvania, annual disease inspection reports must indicate that the following pathogens (diseases) were not detected: *Yersinia ruckerii* (enteric redmouth disease), VHSv (viral hemorrhagic septicemia), IHNV (infectious pancreatic necrosis), PKD (proliferative kidney disease), and *Ceratomyxa shasta* (ceratomyxosis). As deemed necessary by the PFBC, additional pathogens (diseases) may be added to these lists.

- c. Where possible, disease inspections should be conducted when water temperatures are in the range of 51 to 59 degrees Fahrenheit.
3. PCBs.
- a. Trout stocked will have less than 0.21 parts per million (ppm) as determined by testing in accordance with the PCB testing process, procedures and technical protocol set forth in Appendix A. This requirement is consistent with that which applies to Commonwealth raised hatchery fish.
 - b. Potential contractors need to be cognizant of this testing process by reading APPENDIX A and they need to factor the cost for this requirement into their bid.
 - c. Testing Laboratories need to follow the technical protocol and statistical analysis described in Appendix A.
 - d. The contractor may withdraw his or her fish from the procurement without penalty or explanation if the grower cannot obtain the required certifications from a testing laboratory.
 - e. The contractor will provide the Pennsylvania Fish and Boat Commission contact person with: 1) a letter from their PCB testing laboratory certifying that the PCB levels are compliant with the standards specified in item 3a. above and 2) the verification letter to the testing laboratory verifying their compliance with acceptable QC/QA protocol and accuracy of reference sample PCB test results.
 - f. The Pennsylvania Fish and Boat Commission reserves the right to inspect all laboratory data and test results.

STOCKING AND TRANSPORTATION SPECIFICATIONS:

1. Contractor will adhere to the stocking requirements (location, number and size of trout and stocking period) set forth in attachment, unless otherwise modified by mutual agreement of the Bureau of Purchases and the Contractor. Substitutions are not permitted.
2. The Pennsylvania Fish and Boat Commission will give the Contractor a stocking schedule with specific dates at least one (1) month prior to the first stocking of the year.
3. On the day of stocking, a Pennsylvania Fish and Boat Commission representative may be on site at Contractor's facility to observe and report on the condition, number, species and size of fish loaded onto the stocking truck.
4. Contractor will transport the fish to the meeting place designated by the Pennsylvania Fish and Boat Commission, and a representative (most likely, a waterways conservation officer (WCO)) will oversee the stocking of the fish.
5. Upon arrival at the meeting place, at least 99% of the trout must be in stockable condition as determined by the Pennsylvania Fish and Boat Commission representative.
6. Contractor will employ adequate and appropriate safety measures while stocking fish. Contractor is responsible for the health and safety of its officers, employees and agents while stocking.
7. The number of stocking locations per lake are generally 1 – 4 per lake and at the discretion of the Pennsylvania Fish and Boat Commission representative.
8. Upon completion of a stocking, Contractor and the Pennsylvania Fish and Boat Commission representative will complete a report on a form prescribed by the Pennsylvania Fish and Boat Commission, detailing the stocking activity. The report will serve as verification that the stocking was completed as per these contract specifications.

9. If Contractor is unable to meet its stocking obligations, Contractor will notify the Pennsylvania Fish and Boat Commission as soon as possible but in no event less than twenty-four (24) hours prior to the stocking.

10. If the Pennsylvania Fish and Boat Commission reject a load for any reason, Contractor will have five (5) business days to fulfill the stocking as required by the contract.

HATCHERY OPERATIONS:

1. Contractor and its hatchery operations will be in compliance with all applicable environmental regulations.

2. Contractor will treat fish designated for stocking only with drugs that are approved for use on food fish by an authorized use caveat of the U.S. Food and Drug Administration (*i.e.*, FDA approved drug, Low Regulatory Priority Drug, veterinarian's extra label use prescribed drug, INAD).

3. Contractor's facilities are subject to inspection during normal business hours. Facility inspections may include:

- a. Observation of fish to determine overall general condition.
- b. Review of environmental permits.
- c. Review of fish health reports.
- d. Review of drug use reports.
- e. Review of PCB test results and supporting documentation

CONFIDENTIALITY OF STOCKING INFORMATION:

Information regarding stockings, including the name of lake, the number of trout stocked and the date and time of the stocking, is confidential information and released only at the discretion of the Pennsylvania Fish and Boat Commission. Contractor shall not release this information to the public under any circumstances.

Appendix A PCB Testing Process, Procedures and Technical Protocols

Instruction to Contractors

1. PCB Testing is to occur on an annual basis; but for stocking in spring 2004 testing needs to occur in autumn 2003 and PCB testing for autumn 2004 and winter 2005 trout stocking will occur in spring 2004 (See the timetables at the end of this Appendix). Trout stocked will have less than 0.21 parts per million (ppm) as determined by testing in accordance with the PCB testing process, procedures and technical protocol set forth in this Appendix.
2. Successful bidders will need to engage an appropriate private lab, or other acceptable entity, to complete the annual PCB testing. Any laboratory chosen must have either PA DEP SDWA or NELAP certification for PCB analysis. Submit a copy of the laboratory's certification certificate to the Pennsylvania Fish and Boat Commission. The Fish Consumption Technical Workgroup is aware that there are private labs that are able to satisfactorily complete PCB testing of hatchery trout tissue samples according to the PCB testing protocol set forth herein.
3. All laboratories engaged by successful bidders are required to annually obtain a verification letter from the Pennsylvania Fish and Boat Commission through the process described in 4a. through 4d. below. This annual verification will help assure accuracy of testing, and compliance with quality assurance and quality control standards (QA/QC).
4. The annual lab verification process is as follows:
 - a. Successful bidder(s) for this contract will notify the Pennsylvania Fish and Boat Commission of the name, address, contact person and telephone number of the PCB testing lab(s) they intend to use to complete the PCB testing
 - b. Pennsylvania Fish and Boat Commission will provide the contractor's lab with a DEP supplied PCB characterized standard sample of homogenated fish tissue to test for PCB content.
 - c. The lab being used by the contractor will test the reference sample along with the provided trout fillet samples using the technical protocol and statistical analysis methods described below.
 - d. The lab will submit the results of the test on the reference sample to the Pennsylvania Fish and Boat Commission for verification of accuracy and compliance with QC/QA.
 - e. After reviewing the results, Pennsylvania Fish and Boat Commission will provide the contractor and their testing lab with a letter stating whether the results of the reference testing are acceptable or not acceptable.
 - f. Pennsylvania Fish and Boat Commission requires the contractor to submit the analytical verification letter in addition to their contracted laboratory certification that the trout stocked have less than 0.21 parts per million (ppm) PCB's.
 - g. Pennsylvania Fish and Boat Commission will not accept fish from the contractor until both the laboratory certification and analytical verification letter are received.
 - h. The objective of this testing and verification process is to provide the Commonwealth with a product of comparable quality to what is being produced in Commonwealth facilities and provide a reasonable level of assurance that the quality checks by independent labs are accurate.
 - i. In the event that the contractor's lab fails either the small sample size correction analytical verification of their QC/QA or the labs test results of the DEP supplied PCB characterized standard sample of homogenated fish tissue, the contractor may have the contract lab run the samples and characterized standard a second time or the contractor may seek an alternative lab to start the testing and

verification process anew. This retest process is only permitted once; after that the trout are rejected.

5. Between approximately 90 and 150 days prior to the first stocking each year the contractor will have samples of their trout tested for PCB's. Within 30 days prior to stocking the contractor will provide to the Pennsylvania Fish and Boat Commission:
 - a. A laboratory certification that the trout stocked contain less than 0.21 mg/kg PCBs.
 - b. An analytical verification letter from the Pennsylvania Fish and Boat Commission to the lab that completed the testing verifying that the lab accurately tested a reference sample and met quality assurance and quality control standards.

This laboratory certification and verification letter remains valid for twelve (12) months and renewed annually.

PA PROTOCOL FOR PCB ANALYSIS IN COMPOSITE SAMPLES OF HATCHERY TROUT FILLETS:

Samples

Contractor will deliver to the laboratory five (5) representative composite samples of scaled, skin on, fins off, and belly flap attached fillets from eight (8) trout each from the rainbow trout that Contractor intends to utilize in the stocking and one standard reference sample provided annually to each successful bidder by the Pennsylvania Fish and Boat Commission. Fillets are separated from the carcass using a non-powered knife. Each sample composed of no less than 100 grams of fillets and may include fillets from more than eight trout to reach the 100 grams. It is required that the Laboratory test the DEP PCB characterized standard sample of homogenated fish tissue concurrent with the five (5) samples provided by the Contractor.

Laboratory Scope of Work

1. The proposed analysis is for total PCBs based on Aroclor quantitation to provide total PCB levels in five composite samples of fillets (16) from eight (8) trout. The laboratory also will determine the total lipid content of each sample.
2. The Aroclors are expected to primarily be 1254 and 1260. However, the laboratory will test and report to Contractor the following Aroclors: 1221, 1232, 1242, 1248, 1254 and 1260.
3. The laboratory will thoroughly homogenize the composite samples delivered by Contractor.
4. The laboratory will extract an adequate amount of sample to provide a reporting limit less than or equal to 0.05 mg/Kg (wet tissue) for each Aroclor tested.
5. The laboratory will use Soxhlet extraction procedures or equivalent for the sample preparation. The laboratory will optimize the sample extraction technique, choice of extraction solvent(s) and sample cleanup techniques to ensure complete extraction of the target analytes and adequate reduction of co-extracted interferences. The laboratory will provide to the PA Fish and Boat, a detailed procedure describing precisely how the laboratory performed the sample preparation (including extraction method) and cleanup.
6. The laboratory will provide to the Pennsylvania Fish and Boat Commission, a detailed description of the procedure used to determine the % lipids of the samples.
7. The laboratory will analyze the samples for Aroclors by U.S. EPA method 8082 or an alternate method that provides for equal or superior performance (incorporating the additional

client required QC measures below). The laboratory will provide to the Pennsylvania Fish and Boat Commission, a detailed procedure describing the determinative process, including but not limited to, reference chromatograms, column types and conditions, number and identity of calibration peaks, number and concentrations of standards used for calibration and a complete description of all quality control measures employed and their acceptance criteria. As an alternative to Aroclor reporting the laboratory may employ congener specific analysis by EPA method 1668 as long as all 209 congeners are reported.

8. The laboratory will employ, at a minimum, the following quality control measures:
 - a. All samples spiked with both Decachlorobiphenyl (DCB) and Tetrachloro-meta-Xylene (TMX), prior to extraction, at a level not to exceed 0.020 mg/Kg in the wet tissue.
 - b. The laboratory will prepare a minimum of 10% of the samples as both a duplicate and a matrix spike or one duplicate and one matrix spike per preparation batch (samples prepared together during a single work shift), whichever is greater. Matrix spikes made from Aroclor 1260 standards and added prior to sample preparation to produce a concentration not to exceed 0.200 mg/kg in the wet tissue.
 - c. The laboratory will prepare a reagent blank with each preparation batch. The material used for this will be identified and taken through all preparation steps that are used for the samples. The reagent blank treated as a sample for analyses purposes.
 - d. The laboratory will analyze all samples on two dissimilar columns. Both columns calibrated for the quantification of the target analytes.
 - e. Results from the first (primary) column should be used as the reported result; however, if the difference is greater than a 25% or 0.05 mg/Kg between the results obtained from the primary and confirmation columns for this dual analysis method repeat the analysis until the difference is less than 25% or 0.05 mg/Kg.
 - f. Prior to starting analyses, the laboratory will calibrate the chromatographic system with a minimum of 5 initial calibration standards for each Aroclor detected and reported in the samples.
 - g. The laboratory will base Aroclor identification and calibration on a minimum of 5 unique or characteristic chromatographic peaks for each Aroclor being calibrated.
 - h. During the chromatographic analyses process, the laboratory will analyze continuing calibration standards for all target analytes on a frequency not to exceed 12 hours. All chromatographic runs will terminate with a full set of continuing calibration standards. If more than 12 hours elapse without an acceptable continuing calibration standard being run, then generate a full initial calibration curve prior to beginning additional sample analyses.
 - i. An instrument blank will be run to document the absence of any interference associated with the instrument. These blanks are run prior to starting the initial calibration, after the initial calibration and after each continuing calibration (Note: The instrument blank will consist of the same final solvent used for the samples.)
9. The laboratory's quality control acceptance criteria will be equal to or better than the following list. This list is not intended to be all encompassing but rather to address the minimum needed.
 - a. Initial calibration curves will have average %RSDs for each Aroclor or surrogate of less than or equal to 20% or an r^2 greater than or equal to 0.995. In no case will calibrations be forced through the origin or include the origin in the calibration curve.
 - b. Continuing calibrations standards within plus or minus 15% of the known value.
 - c. Instrument blanks and reagent blanks will not indicate the presence of any target compound or the presence of any compounds that could interfere with the identification and quantitation of the target compounds or surrogates.

- d. Average surrogate recoveries (average of front and rear column values) within plus or minus 30% of the known value.
- e. The percent range difference ($\%RD = 100 \times [\text{absolute value } (R1-R2)] / [\text{average } (R1 \& R2)]$) between the results from the two dissimilar columns is to be less than or equal to 25% or less than 0.05 mg/kg in the wet tissue.
- f. Matrix spike recoveries based on net recovery plus or minus 40% of the known spiking value.
- g. The percent range difference between a sample's averaged result and its duplicate analysis' average result will be less than or equal to 25% or less than 0.05 mg/kg in the wet tissue.

Statistical Analysis and Test criteria

The test criterion is that the small sample size corrected upper 95% confidence interval of a one-tailed t-distribution of the mean of the results from the first (primary) column for the five samples composed of eight trout each must be less than 0.21 parts per million total PCB's using. The laboratory is expected to certify that this test criterion is met. This certification will include a copy of the Quality Assurance/Quality Control (QA/QC) report as well as ALL supporting documentation detailed in the PCB testing protocol set forth herein. Should the samples of trout exceed this criterion, the laboratory will not certify them as being less than the criterion and the Pennsylvania Fish and Boat Commission will reject all trout represented by this sample.

1. The laboratory will report the DEP PCB characterized standard sample of homogenated fish tissue as mg/kg of the identified Aroclor(s) and as % w/w lipids.
2. The reported DEP supplied PCB characterized standard sample of homogenated fish tissue result will consist of:
 - a. The Aroclor results from both columns and the averaged value.
 - b. The percent surrogate recoveries for both surrogates from both columns and the averaged values for both compounds.
 - c. The percent lipid value.
 - d. The laboratory will report all prepared QC samples (Reagent Blanks, Matrix Spikes, and Duplicates) in the same manner as the reference standard, with the exception that Matrix Spikes also will report net % recovery of the spike for both columns and the average percent recovery.
3. The primary column results of the sum of all quantified Aroclors (total PCBs) of the individual five samples of trout fillets are averaged and the associated small sample size corrected upper 95% confidence limit of a one-tail t-distribution determined and compared to the maximum allowable PCB concentration of 0.21 mg/Kg (wet tissue).

Testing Laboratory Reporting Criteria:

1. Report on DEP PCB characterized standard sample of homogenated fish tissue
 - a. The actual results of the PCB testing of the DEP PCB characterized standard sample of homogenated fish tissue.
 - b. The detailed information requested below under the Laboratory Scope of Work items # 5, 6, and 7.
 - c. Include the quality control information identified in the Laboratory Scope of work item # 8.
 - d. If the review of the Laboratory report on the DEP PCB characterized standard sample of homogenated fish tissue indicates the associated Quality Control standards were not met or that the numerical test result for total PCB concentration is outside the assigned confidence interval (95% confidence level or +/- 30% of the established mean which ever is larger) of the PCB characterized standard (established by repeated testing of the DEP PCB characterized standard sample of homogenated fish tissue), then the Pennsylvania

Fish and Boat Commission will not verify that the PCB testing laboratory is compliant with the testing protocol and performance standards. And the trout tested in association with the standard are rejected for stocking under this contract.

2. Report to Client the results of trout fillet test and verification letter.
 - a. The PCB testing laboratory needs to provide the letter verifying the QC/QA protocols and performance standards were adequate.
 - b. The PCB testing laboratory needs to provide a letter to their client certifying that the upper 95% confidence interval of the one-tailed t-test of the mean of the results of the five samples provide by the contractor for total PCB quantification is a value less than 0.21 ppm.
 - c. The laboratory will provide data in any format that their client specifies (hard copy, FAX, MS Word, Word Perfect, or MS Excel).
 - d. The laboratory shall report data to their Client within a specified time of delivery of the samples.
 - e. The laboratory shall retain raw data for a minimum of five (5) years from the submission of the results of the analysis of the last sample covered by this contract. The laboratory shall provide raw data for inspection at their client's request.

Time Table for Project

1. Timeline for PCB testing and data exchange for commercially procured rainbow trout. This timeline is based on a commercial grower stocking fish as early as the fall season. Since most of our specs use language like "X number of days before first stocking", the timeline could change if a vendor is only stocking spring pre-season fish and for the spring 2004.

2004 for vendors stocking in spring and other seasons

	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC
2003									PCB Testing		Data verified	
2004	a, b, c below	Mid-Apr.		PCB Testing		Data verified		a, b, c below		Stocking Sept. thru		

2005 through 2009

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC
Mid-Apr.			PCB Testing		Data verified		a, b, c below		Stocking Sept. thru		

Mid-Apr.	PCB Testing	Data verified	a, b, c below	Stocking Sept. thru
----------	----------------	------------------	------------------	---------------------

- a. Annual disease inspection report due to PFBC from contractor.
- b. PCB certification and analytical verification due to Pennsylvania Fish and Boat Commission from contractor.
- c. Stocking schedule due to contractor from Pennsylvania Fish and Boat Commission.
